  - Databases (Postgres, MongoDB, Redis, ...)
  - Web framework
  - Languages
  - Microservice architect
  - RESTful design
  - Get familiar with AWS stack
- Get your hands dirty when experiencing real working environment:
  - Team process
  - Implement app features
  - Make improvement for APIs
  - Implement small products for internal teams.

### WHAT WE NEED:

- Solid background in programming:
  - Data structure
  - Algorithm
  - **Logical thinking!!**
- Programming Language: fluent at least 1 language. Experiences in Golang, Python, Rails will be a plus.
- Attitude: willing to learn new things and own a quality-driven mindset.
- Source Version Control: familiar with Git is a plus.
- Working time: able to work at least 3 days a week.
- OpenSource contribution is a big plus.
