

# FOSSIL

## GROUP

### INTERN, CLOUD TEAM (DATA)

Interns play an integral role at Fossil Vietnam - you're the innovators-to-be, the big idea-creators, and the passionate newcomers who inspire us to make great products. We offer a diverse array of internship possibilities within various functions across the organization. Our programs are open to a limited group of students, as to provide personalized mentorship opportunities and an intimate, up-close perspective on how we work.

We're excited to teach you what we know and be inspired by your insights!

#### WHAT YOU'LL BE RESPONSIBLE FOR:

- Take part in building out scalable and reliable ETL, data pipelines and processes to ingest data from a large number and variety of data sources.
- Learn about big data stacks such as Spark, Hadoop, Redshift, Elasticsearch, Data Pipeline.
- Build, deploy and manage big data solutions that can adequately handle the needs of a rapidly growing data.
- Learn how to work with Amazon Web Services.

#### WHAT WE NEED:

- Programming Language: any scripting language such as Python.
- Software Foundation: good about data areas such as data structure, database, data streaming, etc.
- Attitude: willing to learn new things and own a quality mindset.
- Working time: able to work at least 3 days a week.
- Source Community: contribute on open GitHub, GitLab is a big plus.

Please send your resume to [people@fossil.com](mailto:people@fossil.com) with the subject line as follow:
