VOICE OVER LTE/5G SOFTWARE ENGINEERS (FRESHER)

JOB DESCRIPTION

By joining our distributed cross-functional teams between Sweden and Vietnam, you will be involved in the full system development lifecycle:

- Analyze and propose the solution for new requirements requested by customers;
- Design and implement the feature solutions requested by customers;
- Design and execute the test scenarios from low-level to high-level testing;
- Track the testing results on the Continuous Integration (CI) system to ensure the quality of the feature development;
- Update documents to guide customers to use new features;
- Analyze and answer questions raised from customers towards the product and advise customers to use the released features properly;
- Support the customer for fixing product issues;

At DEK Technologies Vietnam, you will live with Agile & Lean principles where employees are empowered at all levels to collaborate cross-functionally, to take pride in collective ownership, to improve yourself by continuously learning, practicing & sharing with others.

JOB REQUIREMENTS

A University Qualification in Electronic, Telecommunication, Software Engineering or a related degree with:

- Voice Over IP (VoIP) technology (Opensips, IP-PBX, Asterisk, Kamailio, Oracle Communication Application Server, etc.);
- Mobile Telecommunication technology (GSM, WCDMA, LTE, 5G, IMS, etc.);
- Basic programming or scripting experience;
- High teamwork spirit;
- Eager to learn new technologies.

C/C++ SOFTWARE DEVELOPERS (FRESHER)

JOB DESCRIPTION

We have many opportunities for C/C++ Developers to work on a product for one of the world's leading system providers. You will be working with common components used by several applications in a core network solution. The job is to develop and maintain a high availability and high-capacity cluster platform which is used all over the world. It is a Linux based system with the below characteristics:

- High Availability: fault tolerant system, 24/7 service availability
- Scalability: ability to increase or decrease the number of cluster nodes according to the business need without impacting the service availability
- Manageability: software management including installation, upgrade, downgrade on cluster level without impacting the service availability

By joining our team, you will have a chance to collaborate with senior engineers from Australia, Sweden and other countries to:

- Understand the requirement, design, and implement new features
- Troubleshoot issues, suggest, and implement solutions
- Continuously improve together with the team

At DEK Technologies Vietnam, you will live with Agile & Lean principles where employees are empowered at all levels to collaborate cross-functionally, to take pride in collective ownership, to improve yourself by continuously learning, practicing & sharing with others.

JOB REQUIREMENTS

If you have just graduated from University with a Bachelor Degree in either Information Technology, Computer Science or a related degree with:

- C/C++ software development passion;
- High teamwork spirit;
- Basic English communication.

INTERNSHIP PROGRAM 2023

At DEK Technologies you will find yourself in an exciting career with:

- Allowance + Good working facilities
- Opportunities to become DEKer
- An excellent working environment in developing tomorrow's features
- Open and honest culture where people are valued, treated fairly, trusted and empowered
- Training and career development opportunities
- Company activities: Friday Beer, Birthday Party...

JOB DESCRIPTION

DEK Technologies has invested in an innovation laboratory called DEK Lab. This lab is used for different purposes; such as a long-term internship programs for students. The lab is connected to some interesting projects. Project details cannot be described here, but they are all related to cutting-edge technologies such as:

- IP Multimedia Subsystem
- High Availability Systems
- Telecom Services
- CI/CD pipeline and its observability
- IoT applications in a functional programming language

How it works

- We have long-term projects including all of the above. Depending on when you join the project, you will be notified of your area of focus.
- You will work in a Scrum team with other students and DEK staff to create amazing products that are used regularly in our daily lives.
- We believe that it's in your best interest to remain with us for at least 10 weeks to learn, grow and get some real experience.
- You will be treated like staff, sharing a nice office space, attending parties and having interesting clubs such as sports, dancing, music and yoga at your disposal.
- You will also have some allowance while working with us.
- Last but not least, you will definitely have the opportunity to join our awesome team after the internship!

At DEK Technologies Vietnam, you will live with Agile & Lean principles where employees are empowered at all levels to collaborate cross-functionally, to take pride in collective ownership, to improve yourself by continuously learning, practicing & sharing with others.
