Floor 7th, L'Mak Long Tower, 101-103 Nguyen Cuu Van St., Ward 17, Binh Thanh District, HCMC

Timeline

Start at: 14:00

1. Greet & Meet

Greeting
Play a mini game to warm up

2. Company Sharing

Explore our projects, process,
tools, internship program and
sharing from our staffs

3. Office Tour

Discover our passionate teams
and vibrant working environment

4. Experience VR

Experience our VR application
Teabreak
Q&A

Finish at 16:00

Information about the company

Our Story

Saritasa, LLC is a California Limited Liability company started in 2005 primarily as an Internet search company marketing itself under the fictitious business name “Clickbrand”. As Clickbrand, the company provided Pay-Per-Click internet marketing and Search Engine Optimization services. The company was in a small office in Corona del Mar and owned by Nik Froehlich.

In 2006, Clickbrand started doing more development work through hired independent contractors. The number of projects increased and Clickbrand turned to overseas development firms for project fulfillment. One of the firms was a company called Ochen Interesnee located in Ekaterinburg, Russia owned by Dmitry Semenov. Dmitry had started and built a small development firm and was providing development services to mostly US-based companies.

In 2007 Nik and Dmitry met for the first time at a client project in Florida. It was during this week-long meeting that they decided to join their companies together to form and grow a larger software development firm.

In 2008, Saritasa LLC, purchased Dmitry’s company in Russia and Dmitry became a partner of Saritasa and the Chief Technology Officer. Two offices continued to work - in the USA and in Russia (Yekaterinburg). Soon after, the organization opened an office in Kazakhstan. By the end of 2008, Dmitry had moved to the U.S. as a permanent resident.

During 2009 - 2011, Saritasa experienced very rapid growth, fueled by many projects and the explosion of mobile devices and mobile app development. The company had changed its primary brand name to Saritasa and only uses the Clickbrand identity to promote its internet marketing services (which is only

a small part of the overall revenue of Saritasa today). In April 2010, the company opened another office Krasnoyarsk, Russia.

In January 2012, Saritasa moved to Newport Beach, Orange County, California. Also, in August this year, the fifth office of the company was opened - in Vietnam, Ho Chi Minh City. There are several developers with whom you work remotely.

In 2019, the company opened an office in Sochi.

Mission and Vision

Our Mission

We are skilled technologists that apply our passion for technology to create successful products and solutions for our clients. Our passion drives us to be innovative, creative and experts. Our love of technology keeps us learning, motivated, and excited about what we do.

We empower our clients with technology.

Our Vision

Our vision to become a respected technology solutions consulting company based on a strong team of passionate and expert technologists, and evidenced by a very large portfolio of successful projects and clients across the world

We envision a company led by smart, self-motivated, multi-national people doing what they enjoy

Our Values

In short, we solve non-trivial tasks using modern technologies.

We are a team of talented developers, architects, managers, engineers, designers, DevOps-engineers, and QA-engineers using brand new tech to solve non-trivial tasks. We work on VR (Virtual Reality), AR (Augmented Reality), IoT (Internet of Things), web-projects, mobile apps, Enterprise business applications, and Unity Gaming. We create projects using Python, C#, PHP, Objective-C, JavaScript, (React, Vue.js, Angular), Java, and Swift and deploy them into AWS / Azure / Google Cloud.

We live in different countries, cities, and time zones, but we work together on VR, AR, IoT, web projects and mobile applications, Enterprise business applications. We professionally speak different languages: Russian, English, German, Chinese, Vietnamese and "no accent" in Python, C #, PHP, JavaScript (Angular, React, Vue.js), Swift, Kotlin.

We do not strive to implement all the ideas that come across our way because we adore the Challenge - we always choose projects with a twist, those where you need to come up with solutions that did not exist before. We are interested in working on projects with various technologies and unique solutions that can be patented.

We try to build the best communication processes - both with clients and within the company. We are proud to offer the highest quality standards to any of our customers. We are constantly growing and changing every day. We are not interested in working on those things that have been implemented hundreds of times before us, where there are dozens of How-Tos. But if the client says "This is going to be very difficult or nearly impossible to implement" - this is our client.

Our team is always glad to have like-minded people who would be interested to work with us!

What do we value in each other?

Our corporate values help us a lot in our work. We assure that they will be useful to you too:

- **Make decisions and take responsibility**
- Appreciate people for what they do and achieve, not for what they say.
- Constantly improve and improve your work.
- Don't be afraid to make mistakes. Correct mistakes and learn.
- Take responsibility for completing tasks.
- Don't say "no", say "how".
- Learn new things every day.
- Contribute proposals.

- **Work as a team.**
- Focus on the result. Collaborate with others to achieve it.
- Share your opinion and at the same time be ready to accept someone else's point of view.
- Do not "merge" the work to others, said ready – it means ready.
- Get the job done quickly, without sacrificing quality.
- Learn from experience and share yours.
- Be open to new ideas.
- Help others.
- Respect your colleagues!
