JOB DESCRIPTION
AI INNOVATION INTERN

Job Title	AI Innovation Intern
Location	1st & 2nd Floor, Room 201, D.C Tower, 111D Ly Chinh Thang, Vo Thi Sau Ward, District 3, HCM city
Internship Type	Full-time
Duration	03 months

Job Overview

We're looking for an AI Innovation Intern who's curious, creative, and eager to explore how artificial intelligence can transform the way businesses operate. You'll experiment with new tools, build quick prototypes, and help us find real-world applications of AI across our teams and products. No need to be an AI expert — what we value is your initiative, learning mindset, and ability to connect ideas with real use cases.

What You'll Be Doing

As an AI Innovation Intern, you'll play a key role in researching and experimenting with the latest AI tools, helping identify how they can be applied to real-world workflows and company products. Your responsibilities will include, but are not limited to:

- **Explore New AI Tools:** Research and test the latest AI tools, APIs, and trends (e.g., ChatGPT, Claude, LLMs, image generation, no-code AI) to discover their potential value.
- **Build and Test Prototypes:** Quickly turn ideas into functional prototypes and validate their effectiveness using Python, Google Colab, Zapier, or no-code platforms.
- **Identify Use Cases:** Work with product, engineering, and business teams to spot areas where AI can streamline workflows, solve problems, or add value to existing processes.

- **Document and Demo:** Clearly document your findings and share short demos or write-ups to help teams understand how to adopt and apply new tools.
- **Stay on the Cutting Edge:** Keep up with the evolving AI ecosystem and recommend experiments that align with company goals and real-world needs.
- **Bring Curiosity and Initiative:** Approach the role with a passion for continuous learning, proactively exploring how AI can change the world.

Your skills and experience

Must have

- Bachelor's degree in Computer Science, Artificial Intelligence, or a related field. Candidates from other backgrounds **are encouraged to apply, especially those with** a strong interest in AI and a proven ability to learn and experiment.
- Basic understanding of AI concepts (e.g., large language models, machine learning, chatbots, etc.).
- Fast learner, problem solver, and not afraid to try new things.
- Good communication skills - you can explain ideas clearly and simply.

Nice to have

- Familiarity with no-code tools (e.g., Zapier, Notion AI, Make.com, Airtable, etc.)
- Experience with prompt engineering, data analysis, or simple scripting.
- Interest in UI/UX or product design thinking.

Benefits

- Monthly allowance
- Hands-on experience with real projects and **on-the-job training** guided by experienced mentors.
- Yearly team outings and events.
- Flexible working hours from Monday to Friday.
- Free drinks, snacks, parking, and access to internal clubs.

Together, we can achieve great things and make a lasting impact in the industry. Join us on this exciting journey!
